List of Completed and Current Research

IX. RESEARCH

(a) Completed

1. Effects of Ciprofloxacin on Heart Rate and QT/QTc Measurements in Dogs. (Publication 1)
2. Wound Healing Potentials of Aqueous Pineapple (*Ananas comosus*) Extract. (Publication 2)

(b) In Progress

i. Dog Owners' Knowledge and Dental-Care Practices in Southwestern Nigeria

An analytical cross-sectional survey assessing dog owners' knowledge of canine oral health, recognition of oral disease, and dental-care practices across six states in southwestern Nigeria.

ii. Clinical Characterisation of Canine Oral Disease in Southwestern Nigeria

A multicentre, facility-based cross-sectional study characterising clinically detectable oral and periodontal abnormalities in dogs presented to participating veterinary facilities across six states in southwestern Nigeria.

iii. Changes in canine oral microobiome Following Professional Dental Scaling and Polishing in Dogs

A prospective, paired pre-treatment and post-treatment study evaluating changes in the detection and abundance of two periodontal bacterial species following professional dental scaling and polishing in dogs presented to the Veterinary Teaching Hospital, University of Ibadan.
